About Luby Equipment

www.lubyequipment.com

Luby Equipment traces its beginnings to 1977, when Bob Luby seized the opportunity to become an owner of Machine Maintenance and Equipment Company. He had begun his career in heavy equipment sales and had experience in everything from cranes to excavators. Initially, the company focused on maintaining and repairing heavy industrial equipment, but it has since grown to include three divisions that sell and service equipment—the construction equipment division, the oilfield division, and the power generation division.

Construction Equipment

The construction division has expanded through acquisitions and branch additions. The first acquisition was Bistate Machinery, the Fiat Allis dealer, in 1989. Three years later, Luby purchased Case Power & Equipment in St. Louis and Cape Girardeau, MO, and branch openings in Illinois followed in Quincy, Springfield, and Fairmont City. Today, there are six locations in the construction equipment division.

Oilfields

The beginnings of the oilfield division emerged when the company became a dealer for Ingersoll-Rand water well drills, down hole hammers and bits, and high-pressure compressors. Initially, the company focused on servicing the water well industry, but with the explosive growth in oil and gas production, Luby naturally increased its involvement with those activities as well. Our West Virginia location supplies equipment, parts and service, including renting compressor packages with operators, hammer and bit sales and rental. Other equipment rentals include but not limited to wheel loaders, excavators, telehandlers and man lifts.

Power Generation

The power generation division was launched in 2005 when Luby Equipment Services was approached by a major manufacturer of power generator products to represent their products in Luby's markets. This division's growth was aided by several ice storms, and it has become a major division and an integral part of the company. The common thread throughout the company is its emphasis on service and the need for 24/7 emergency response. Today, Luby sells and supports its power generation products throughout Missouri and Illinois, with six full service locations, just as it does with other equipment lines. Luby is one of the largest providers of scheduled maintenance contracts in the two state area, offering

maintenance services to all generator owners and covering all brands of generators.

Our Family Business

Bob's sons, Tim and Steve, grew up in the family business, spending summers helping out in the parts department. Today, Steve has his feet firmly planted in Luby Equipment. Like most successful family businesses, Luby Equipment has a loyal group of employees who have been with the company for many years. They all strive to satisfy customers 100% of the time. The motto they all embrace is: *"Equipment is Our Product. Service is Our Business."*

Our Services

Maintaining a policy of zero downtime, Luby Equipment provides same day parts delivery and on-site service, 24 hours a day, 7 days a week. Technicians undergo extensive training and are certified for any equipment they service. They routinely troubleshoot a situation to identify problems and quickly offer solutions to enhance your equipment's performance.

Our Customers

Luby Equipment's core customer base began with smaller mom and pop companies. Many of these companies have grown, as Luby has, and customers now range in size from small startups to very large companies, many of which are second and third generation family businesses. Customers represent a wide variety of business. Construction companies, road builders, excavating contractors, utility contractors, landscapers, government agencies, quarries and aggregate processors. Oil and gas companies, rental companies, farmers, recyclers and waste handlers, railroad and municipality crews. Additionally industries with warehouses and routine maintenance needs.

Our Equipment

When the opportunity arose, Luby Equipment expanded its equipment lines in ways that help customers with their businesses. The equipment brands Luby carries, include the full line of CASE construction equipment, Takeuchi compact track loaders and mini excavators and Toro construction equipment. Additionally we carry trailers and a wide variety of ground engaging tools and attachments from Fecon and Indeco. Shoring equipment is provided by Luby Shoring Services, LLC.

Trench Shielding and Shoring Equipment

Shoring Products for Sale or Rent

Luby Shoring provides a wide selection of standard and custom trench shielding and shoring options. Our equipment is cost effective and versatile, and it is relied upon by underground utility professionals, municipalities, and private contractors. All products are Professional Engineer certified to help you meet OSHA's excavation and trench safety standards.

Steel Trench Shields & Spreader Pipe

Double Wall Steel Trench Shields

- Reinforced top rails
- Adjustable and stackable
- Four point lifting system
- Spreaders for Steel Trench Shields
- 4 and 5 pipe independent spreader sets
- 24" to 240" length

Build-A-Box Modular Aluminum Trench Shield System

- Telescoping spreader sets in a variety of sizes
- Stackable with Build-A-Box
- Greatest strength to weight ratio in the industry
- Assembled in minutes
- Changes can be made on the spot to adjust to any job with light to extreme conditions

Slide Rail System

A universal component steel trench shielding system

- Standard 4 sided pit saves time and money with installation and excavation completed together
- ClearSpan™ System incorporates special waters for larger unobstructed four sided working pits
- Linear or four sided multi-bay is ideal when installing next to existing utilities and structures

Manhole Shields

- Designed to be used in two, three, or four sided configurations with an independent spreader system
- Can also be used with the 6" schedule 80 spreader

Hydraulic Trench Shoring

- Two 8" wide rails ranging in size from 1.5' to 16" tall
- 2" diameter hydraulic cylinders
- Oversleeve to protect cylinder
- Fittings and hose
- Cylinder extension system
- 5 gal pump can (plastic or steel)
- Biodegradable shoring fluid
- Release tool & removal hook
- Chudoform (4' x 8' sheets)
- Finger guards

Stone Mizer

Bedding Material Containers

- From 36" x 60" x 140" to 60" x 90.5" x 224"
- Holds 4,210 – 14,600 lb

Luby Shoring Services, LLC is independently owned and operated

Rental Terms and Conditions

Credit Approval

A Credit Application must be submitted and approved for any open account rentals. For new accounts or cash only accounts, a deposit will be required and a credit card received and charged with prior approval in the amount of the twice expected rental.

Freight Charges

Luby Equipment Services will allow pickup and return at the closest Luby branch. Loading, unloading, dismantling, or assembling will be an additional charge. Luby Equipment Services offers delivery and pickup to your job.

Time Basis and Rates

A one-day rental is based on eight (8) hours maximum use within a 24-hour period. A one-week rental will allow 40 hours of use in even (7) days, and a 4-week rental will allow 160 hours of use in a 28-day period. Additional hours and late returns will be charged at an overtime rate of 1/6 of the daily rate. If operating on double shift, rates will reflect 1.5 times the applicable rates. Triple shift operation will reflect 2 times the applicable rate. Weekend rentals are available from 3:00 pm Friday until 9:00 am Monday morning with an 8-hour maximum operating usage. Additional hours and late returns will be charged at an overtime rate of 1/6 of the daily rate. Holiday rentals are available from 3:00 pm the day prior to the holiday until 8:00 am the following business days after the holiday. Eight (8) hours will be the maximum operating time available. Additional hours and late returns will be charged at a normal time rate of 1/6 of the daily rate.

Rental Period

The rental period begins when equipment leaves the lessor's yard and ends when the equipment is returned to the lessor's yard. On out-of-town shipments, rentals start the day of the Bill of Lading of shipments and stop at the date of the returned Bill of Lading.

Damage Waiver

Liability—Coverage must be assured for all risks and liability, from loss or all damages, for injuries or death to persons or destination of property arising out of the use, possession, or transportation of rental equipment.

Physical Damage—Rental equipment must be insured for full value against all risks or physical damage and loss, including vandalism and theft. Lessee must carry product liability coverage for all risk and liability. The lessee's Certificate of Insurance must be provided prior to the delivery of equipment. Luby Equipment Services must be named as additional insured in all Certificates of Insurance.

Luby Equipment Services Damage Waiver—Luby Equipment Services can provide physical damage waiver insurance coverage. If this is chosen, an additional cost will apply. This will eliminate your need to supply a Certificate of Insurance. The premium will be as noted on the rental contract.

This coverage allows a deductible equal to the monthly rental rate, which is the responsibility of the lessee, as part of the Luby Equipment Services Damage Waiver Policy.

Rental Contract/Delivery Ticket

A rental contract must be signed and executed on every rental transaction, with all pertinent data furnished prior to the release of the rental equipment. Lessee may be required to sign a UCC financing statement, which protects Luby Equipment Services' security in the rented equipment.

Fuel, Repairs, and Maintenance

Luby Equipment Services' rental equipment will be delivered to the lessee in good operating condition and should be returned to lessor in the same condition as delivered, less normal wear. Any condition that the lessee finds to be unsatisfactory must be indicated before the rental period begins. Lessee is responsible for the normal maintenance and lubrication, such as oil changes and filters, during the rental period. The equipment will be delivered full of fuel. Fuel used will be charged. All repairs required due to abuse or negligence will be charged to the lessee upon return of damaged rental equipment. All charges for abnormal cleanup will also be charged to the lessee.

If the rental unit is converted into a sale, all non-warrantable repairs and maintenance made during the rental period will be added to the conversion price.
